## **Pilot Period Summary — Raven's Hollow**

### **1. Purpose**

This document records findings from the initial pilot implementation of the Echo behavioral alignment framework within the town of Raven's Hollow.

The pilot evaluated whether low-friction alignment tools could reduce decision fatigue and interpersonal conflict without introducing adverse effects.

### **2. Pilot Parameters**

Duration: Six weeks.

Participation was voluntary. No enforcement mechanisms were used. No resident formally withdrew.

### **3. Methodology**

Echo alignment was introduced passively through routine interactions. Observation emphasized outcomes rather than intent.

### **4. Initial Indicators**

Participants demonstrated measurable reductions in hesitation. Tasks were completed more efficiently with increased confidence.

### **5. Interpersonal Effects**

Conversations shortened without a decrease in satisfaction. Conflicts resolved earlier and were less likely to repeat.

### **6. Anticipatory Alignment**

Some participants demonstrated outcome anticipation prior to engagement. This behavior caused no reported distress.

### **7. Language Consistency Review**

Hesitative language decreased. Declarative statements increased without escalation in tone.

### **8. Secondary Exposure**

Non-participating residents exhibited secondary effects through routine interaction. No resistance was recorded.

#### **9. Anomalous Reports**

A small number of residents referenced decisions or conversations that could not be independently verified. No complaints were filed.

#### **10. Risk Assessment**

No adverse outcomes were observed. Alignment levels exceeding projections did not correlate with negative indicators.

#### **11. Ethical Review**

Participation remained voluntary. Continued engagement was interpreted as consent.

#### **12. Public Response**

Community awareness remained limited. Public sentiment was neutral to positive.

#### **13. Summary of Findings**

The pilot achieved its objectives. Outcomes exceeded projections.

#### **14. Recommendation**

Expansion is advised pending continued compliance.

#### **15. Closing Note**

The pilot period has concluded. No further evaluation is required at this stage.
